

ALICE VALENÇA DE LORENCI

+44 07386 797481 | adelorenci@gmail.com | linkedin.com/in/alice-valenca-de-lorenci | London, UK

EDUCATION

PhD in Mathematics Imperial College London - Ergodic theory and complex network dynamics - President's PhD Scholar <u>Scientific advisers</u>: Sebastian van Strien, Matteo Tanzi	2025-2028 London, UK
Master by Research, Mathematics and Applications GPA: 18.7/20.0 Highest Honours ENS Paris-Saclay Master thesis: Channel-Invariant Self-Supervised Learning	2023 - 2024 Gif-sur-Yvette, France
Engineering Degree (Dual Degree) GPA: 4.0/4.0 Télécom Paris, Institut Polytechnique de Paris Awarded excellency scholarships from both the University of São Paulo and Télécom Paris to pursue the Dual Degree program.	2022 - 2024 Palaiseau, France
Computer Engineering Degree GPA: 9.7/10.0 Rank: 1 st of 63 University of São Paulo (USP) Primary home institution for the Dual Degree program with Télécom Paris.	2019 - 2024 São Carlos, Brazil

EXPERIENCE

Research Assistant Institute of Mathematical and Computer Sciences, University of São Paulo (USP) - Researching Complex Systems, with special interest in the Ergodic Theory point of view. - Research scholarship from the São Paulo Research Foundation (FAPESP). <u>Scientific adviser</u>: Tiago Pereira.	2024 - 2025 São Carlos, Brazil
Research Scientist Intern Fundamental AI Research (FAIR), Meta - Conducted research on Channel-Invariant Self-Supervised Learning for cellular microscopy images in collaboration with researchers from the University of Wisconsin-Madison and Columbia University. <u>Scientific advisers</u>: Camille Couprie and Piotr Bojanowski. <u>Publication</u>: De Lorenci et al. <i>Scaling Channel-Adaptive Self-Supervised Learning</i>. Transactions on Machine Learning Research, 2025.	2024 Paris, France
Student Researcher Institute of Mathematical and Computer Sciences, University of São Paulo (USP) - Worked on Compressed Sensing in the context of system dynamics reconstruction. This involved studying advanced matrix theory (P. Lancaster), as well as Dynamical Systems theory, more specifically, circle dynamics. - Research scholarship from the Institute Serrapilheira. <u>Scientific adviser</u>: Tiago Pereira.	2019 - 2022 São Carlos, Brazil
Volunteer Education Team Member Group of Women Students in STEM (GRACE), University of São Paulo (USP) - Proposed and co-lead a team to develop a course on programming applied to robotics aimed at girls from public schools. - Worked as a mentor on the Technovation Summer School for Girls 2022. - Awarded a scholarship for my contributions, funded by the Social Inclusion and Diversity at USP program.	2021 - 2022 São Carlos, Brazil
Mathematics Study Group Lecturer Institute of Mathematical and Computer Sciences, University of São Paulo (USP) Gave seminars on operator theory in finite-dimensional vector spaces (T. Kato) and mathematical analysis (W. Rudin).	2019 São Carlos, Brazil

HONOURS AND AWARDS

Institute of Engineering Award – Outstanding Students , Brazilian Institute of Engineering National award recognising outstanding graduating students for their academic performance, research projects, and technical and scientific contributions in their fields.	2025
Distinguished Student Award , Brazilian Computer Society (SBC) National award granted to students who demonstrate outstanding academic performance, research excellence, and significant contributions to university outreach activities.	2025

- CREA-SP Certificate of Academic Merit**, São Paulo Regional Council of Engineering and Agronomy 2025
- Awarded in recognition of the best academic performance in the Computer Engineering cohort.
- CAPES University Talent Award**, Brazilian Ministry of Education | 2nd of 10,848 2020
- National academic distinction award that recognises excellence in academic performance of first-year undergraduate students.
- Academic Distinction Award**, Institute of Mathematical and Computer Sciences, University of São Paulo (USP) 2019
- The award honours the top freshman Computer Engineering student who has exceptionally distinguished academic records.

CONFERENCES AND WORKSHOPS

1. **Invited Talk**, "Workshop on Random Dynamical Systems and Network Dynamics" at IMPA, Rio de Janeiro, Brazil (2026)
2. **Conference Organizer**, "One-Dimensional Dynamics and High-Dimensional Network Systems" at Scuola Normale Superiore, Pisa, Italy (2026)
